Points	Descriptions
Position 20	Graceful posture, from head to the end of tail forming a straight line. Consistent and rough appearance. Position with a standing angle of 50°. Complete harmony between all parts of the bird.
Size 20	Size 21 cm. minimum The goal is to enlarge the size updating the standard.
Tail 20	The long tail is in extension with the body, and clearly on a straight line with the back. The end of the tail width should not be smaller than the shoulders width. The length of the tail must be in proportion with the body length.
Body, Wings & Plumage 15	Long, elongated body with well implanted shoulders attached to the body. Long wings covering at least 1/3 of the tail. Primary flights aligned and regular. The tips of the wings joining in the upper part of the tail without crossing. Plumage smooth, neat, solid and semi-long.
Head & Neck 10	Round and slightly flat head in the upper part of the skull and proportional to the body, short conical beak. Well marked neck, not too big or too short. Round eyes with no eyebrows.
Legs 10	Strong and firm legs. The thighs are long and visible. Feathered thighs.
Condition 5	The bird should be healthy, vibrant and active.
